iWall

The New Standard for Interactive Walls

MultiTaction® iWall is an interactive display like nothing before. 200 fps computer vision touch tracking delivers industry leading responsiveness to unlimited number of concurrent users. Combined with simultaneous touch, pen annotation and real life object detection, MultiTaction® iWall is the new standard for interactive displays.

At 16' by 9' the MultiTaction® iWall makes an immediate impact on any audience in any location. 8K resolution combined with 500 nits screen brightness provides astounding image quality that is certain to draw attention.

MultiTaction® iWall is the communication channel for any corporate brand. High quality look and functionality delivers the message in an effective way that leaves a lasting impression on the audience. MultiTaction® iWall is more than a touch display, it is an experience.

MultiTaction® iWall is a social experience, inspiring users to collaborate, communicate and explore. State-of-the-art interactive experience opens new ways of thinking, innovation and creation. MultiTaction® iWall is in the center of this new excitement.

MultiTaction® Codice™ identifies the users of MultiTaction® iWall, creating a truly bi-directional link between the user and your content. Whether it is your clients sending product information to themselves directly from the display or a sales person identifying herself to make a sales pitch on the wall, MultiTaction® iWall changes the use of corporate video walls forever.

MultiTaction® iWall is an interactive video wall targeted to public spaces such as corporate lobbies, sales offices, city hot spots, product showcases or visitor centers. Designed for continuous use, MultiTaction iWall is a robust, turn-key solution that sets a new standard for interactive walls.

Application and Content

MultiTaction® iWall includes a customized MultiTaction® Experience Application. It is a scalable multi-user application designed to present a wide range of rich media content in a playful way. Miniapps provide additional functionality such as social media integration.

Experience supports MultiTaction® Codice™ user identification as well as IR Pen input to engage with users in new ways.

Basic customization of the Experience app to client look and content is included in the delivery.

- iWall is ready to use with this app
- MultiTouch can further develop the application to fulfill specific requirements
- 3rd parties can develop and run applications using the free SDK
